

Safety measures in Escaperoom Leiden

In this escape room your team is locked up in the secret painting studio of Rembrandt. The game in our escape room is safe. We have taken several safety measures. It is important that you read these measures before you play the escape room.

Security cameras

Our game host watches and listens during the game via a camera system. In case of an emergency the game host can open the door of the escape room immediately. It's possible to leave the game for whatever reason, if someone wants to. The game host then opens the door immediately and the rest of the group can finish the game.

Emergency button

In the event of a calamity, the door of the escape room can always be opened from the inside with the emergency button hanging to the left of the door. USE THIS EMERGENCY KEY ONLY IN EMERGENCY SITUATIONS!

Fire extinguisher and smoke detectors

There is an approved fire extinguisher on the ground floor. You can find the extinguisher next to the red icon. There are smoke detectors in the building.

Prefer to leave the door unlocked?

Groups that would like the escape room door to remain open, can ask the game host prior to the game.

Prefer to see the room in advance?

Players who would like to see the room prior to the game, can take a look at the room together with the game host. Please ask this before the game starts.
